

Eco Leaders:

As Eco Leaders, we work together to help make our school a greener, cleaner, and more sustainable place. We encourage everyone to recycle, save energy, reduce waste, and care for our environment. We also organise and support activities that raise awareness about protecting the planet, while setting a good example and inspiring others to make environmentally friendly choices every day. We are proud to share ideas, take action, and help create a positive change in our school community for the future.

What have we been up to?

As Eco Leaders, we have been busy taking action to make our school and local community more environmentally friendly. We have organised litter picks around the school, encouraged recycling in the playground, and helped raise awareness about looking after our environment. We planned Earth Day activities for every class, including a poster competition which we judged and awarded prizes for. We are also supporting Sale Town in Bloom with their project to create Sale's first recycled plastic mural, which will be displayed on Hereford Street in the town centre. We have been helping to collect plastic bottle lids ready for the mural to be created in September, showing how small actions can make a big difference!

Pupil Voice:

'I loved the activities we did together to help the Earth'

'I liked planning our activities as a group'

'I liked discussing activities and getting the whole school involved to help our home, the Earth'

'Picking up rubbish in our playground was my favourite part of Eco Group!'

'I liked helping the classes and running the workshop for our Earth day project'
